

Accessories

Metal & Acrylic

PANEL

Overview

To enhance your workspace that little more we recommend the use of the unique Panel screen accessories. Each accessory performs a specific function, whether it's to free your desktop of paperwork, hold pens & pencils in one location or to support media accessories above desk height. The painted finish compliments the screen frame as well as the self coloured acrylic used on the plastic versions. The number of accessories on a screen depends upon what you need - there is no limit to your imagination.
